

Hi. I'm Smile.

I still have to work for a living but my friend Kate FINALLY retired last year.

She was excited to enjoy life more -- like taking a cruise to the Caribbean, spoiling her grandkids ... and spoiling HERSELF at the casino.

But her Original Medicare plan doesn't cover as much as she thought it would.

And that REALLY threw a wrench in her retirement plans.

Instead of having fun ... she was staring at a pile of medical bills.

Bills for high deductibles and co-pays, a night in the hospital, and a LOT more.

Kate WANTS to enjoy retirement ... but she doesn't wanna break the bank doing it.

Sound familiar?

Thankfully, Kate heard about Medicare ... Supplement ... insurance.

It's SUPPLEMENTAL Medicare insurance made for people just like her ... to help cover those extra costs the original plan won't cover.

Costs like hospital stays, co-insurance, co-pays, deductibles, skilled nursing, hospice care and more.

It even covers emergency medical care when she travels overseas.

Medicare supplement insurance helps Kate save THOUSANDS every year.

So she gets the care she needs. AND enjoys the retirement she deserves.

Now Kate takes her Caribbean cruises, spoils her grandkids all the time, and still gets to play the slot machines every weekend.

How much money could YOU save with Medicare Supplement insurance?
